

# Help! I can't print when I run to HTML ...

You may be experiencing an issue when attempting to print a report that's been run to HTML. We have tried to troubleshoot this and found that at this time, most reports\* will have this restriction to functionality. The best solution/workaround we can give you is to run your report to PDF and print from there. If/when this issue is resolved, we will communicate that information.

1. Click the **Run** button to re-run the report.
2. Choose **Run PDF**.

3. From the Adobe toolbar, click **Print**.
